CHARACTERISTICS THAT
MAKE THE DIFFERENCE

CLOUD
CONTROL

It has never been so easy to program your digital cross.
The cloud content control system allows you to connect with your LED cross through a browser anywhere, without the need to install any program.
Access all necessary functions for programming, scheduling, settings, reports, etc.

TOTAL CONTROL

The complete display control system allows total management of your equipment(s)

- It will allow you to load multimedia files of video, photos and sound in all kinds of formats;
- Schedule your content in a timeline and calendar;
- It will allow you to divide your display into several areas to show various contents at the same time.

This tool comes standard on the LED display, also allowing you to control one or multiple displays. You can generate individualized or shared schedules from a single management panel anywhere.

Centralized management of all your equipment, including Video Walls, digital mupies, LCDs, etc.
