publiduplo

LED displays

engineered for outstanding solutions

WHY PUBLIDUPLO!

Signs were the products that launched Publiduplo, but we are much more than that. We work closely with our clients to offer a seamless and trusted service so we can integrate solutions to companies all over the globe

Signs are now just one facet of the range of products we design and fabricate. We're extremely proud of the fact that we are able to handle every project in house, because it means we don't need to rely on third-party vendors to get the job done...

...and we can always deliver the consistent, high-quality products and service we're known for. Based on years of experience in the LED industry, we can offer you display solutions in any size or shape supported by hard commitment during your project.

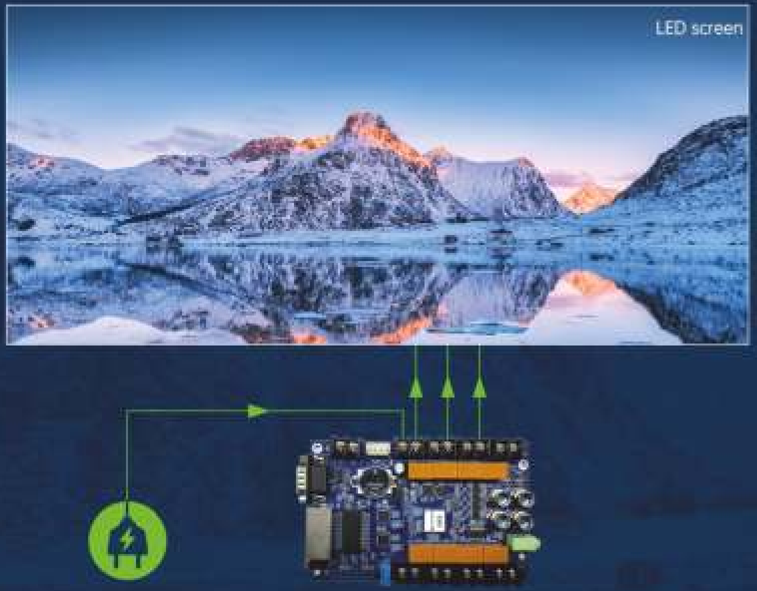
- Power management
- Brightness adjustment
- Temperature monitoring
- Humidity monitoring
- Noise monitoring
- PM2.5 monitoring
- Timing control

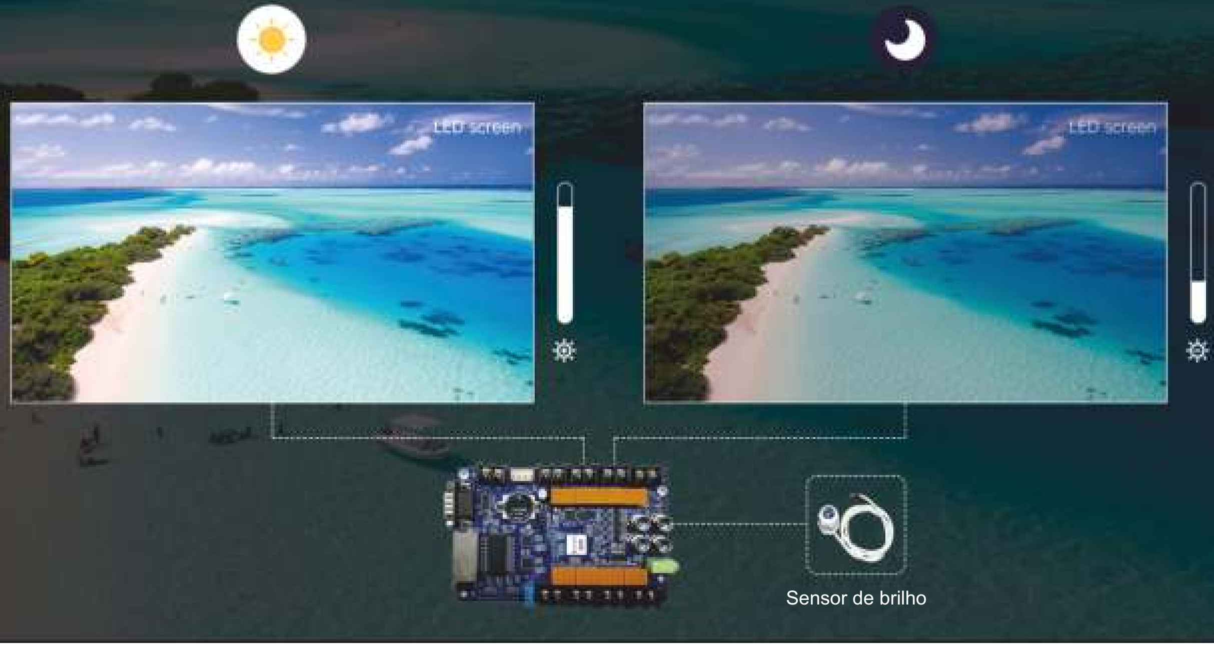
GESTÃO DE ENERGIA

A maior eficiência energética através de uma gestão centralizada e inteligente.



Automatic brightness adjustment.

Com o nosso inovador sensor de brilho, o display ajusta automáticamente o brilho com base na luz ambiente. Durante o dia, mais brilho, enquanto durante a noite menos brilho, mantendo os consumos energéticos mais baixos e uma leitura perfeita a qualquer hora do dia. Tudo isto, personalizável e adaptável ás suas necessidades.



Timing control.

Timming control permite-lhe controlar os acessórios como brilho, temperatura, etc, e gerir toda a energia do equipamento de acordo com programação horária.
